

AVNI

BEYOND EXCELLENCE

GLASS SYSTEMS

AVNI INTRODUCTION

AVNI, in its true essence, means earth which we call our home. We understand the importance of home, safety & peace. To elevate your lifestyle, we have a curated range of glass systems.

We specialize in creating custom glass solutions for a variety of applications, including shower cubicles, office partitions, doors, & spider glazing systems. Our proficient team is dedicated to helping you bring your vision to life, whether it's a shower cubicle installation for your home or a spider glazing system for your commercial space or showroom.

We also have a vertical which is dedicated towards passive fire protection - **Fire Doors**.

We elevate your **lifestyle**. We elevate your **AVNI**.

OUR CORE VALUES

3S

SIMPLE

SAFE

SATISFY

Mission :

To deliver a culmination of **safe, simple, & satisfactory** solutions seamlessly.

Vision :

To build a **safer world** with exemplary safety solutions that are simple yet utterly effective.

WHY AVNI?

PERFORMANCE:

AVNI's Glass Systems are designed to provide durable & safe barriers that withstand the rigors of daily use. To certify this, AVNI uses accessories & systems that are tested & approved by international standards.

DESIGN & BUILD:

Through seamless and hassle-free communication, we precisely understand your budget and requirements. We then strive to design systems that are durable and aesthetically pleasing, and gel with your needs. Upon your approval, we send the glasses for tempering. Then, from production to transportation, to delivery and installation, we assure a seamless flow of the handover.

VARIETY:

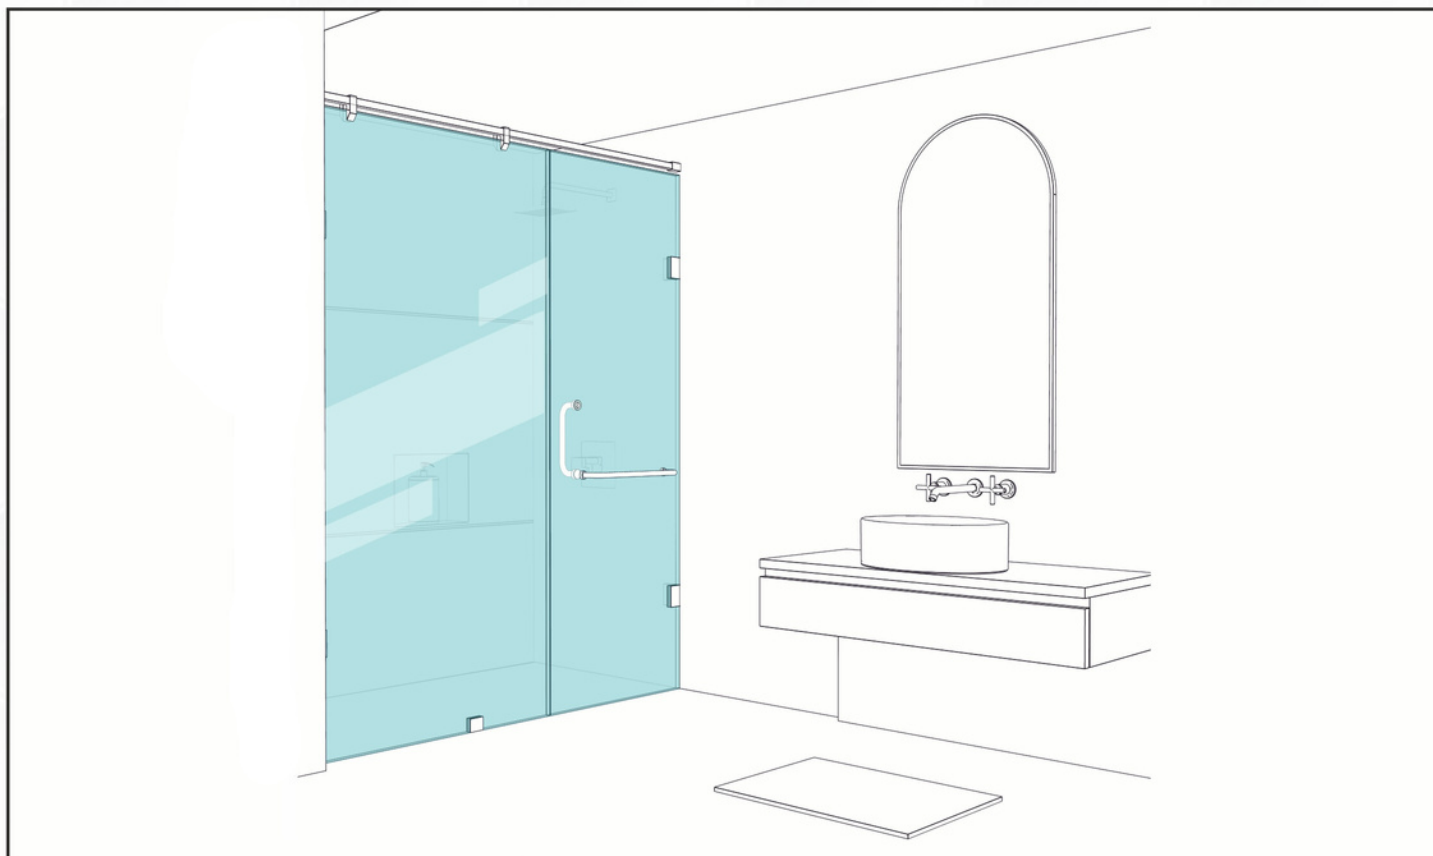

To give you the design of your choice, AVNI offers a wide range of glasses:

1. Clear Glass
2. Frosted Glass
3. Tinted Glass
4. Fluted Glass
5. Nano-Coated Glass
6. Digitally Printed Glass
7. Extra Clear Glass

SHOWER CUBICLES

DROIT

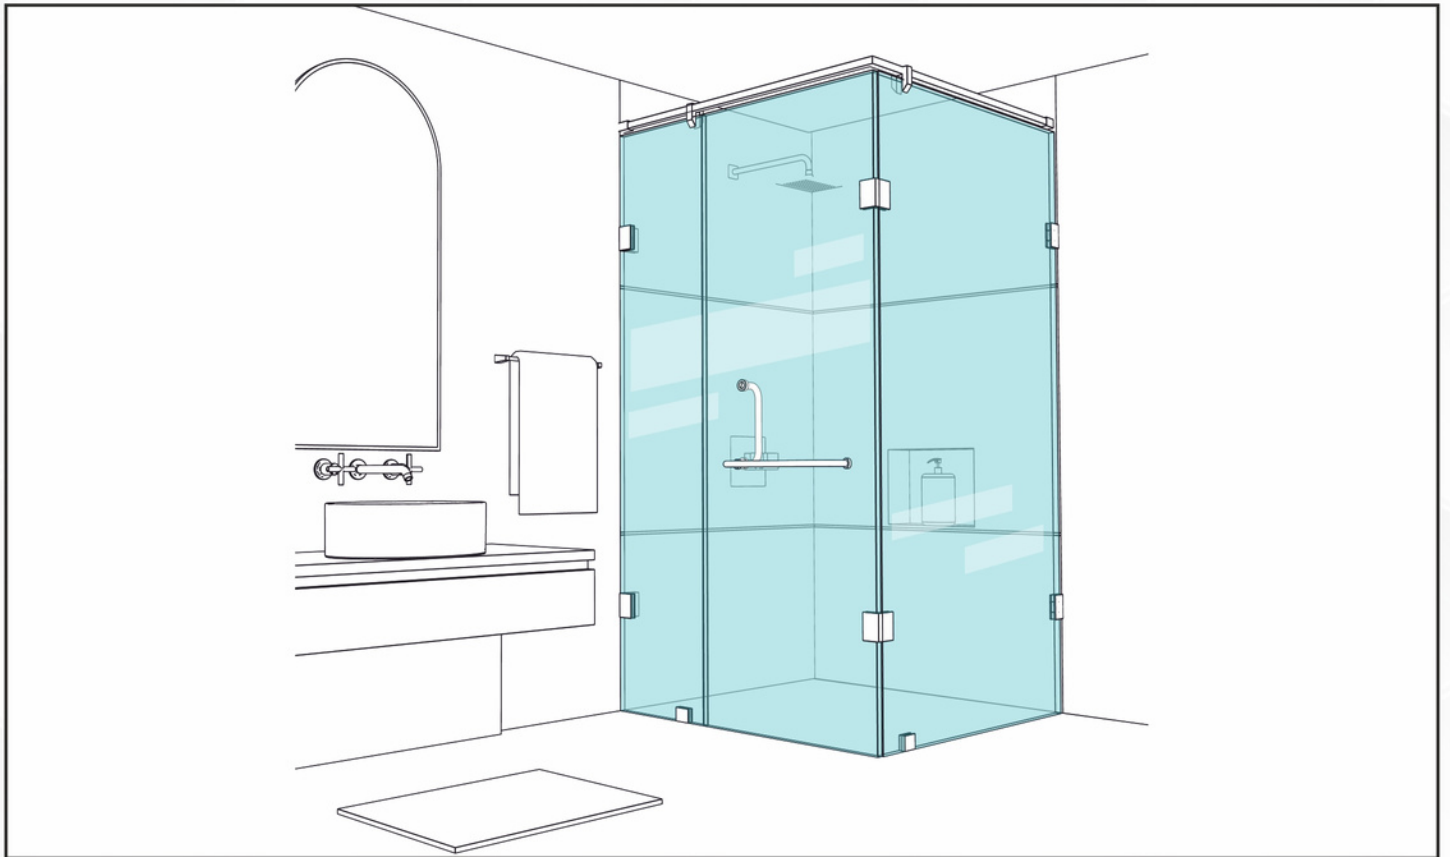

AVNI's DROIT Cubicle is designed to be installed in a straight-line configuration. It is a simple and practical design, ideal for bathrooms with limited space or for those who prefer a minimalist look. DROIT consists of a fixed panel and an openable shutter. It is the perfect solution for those who want to make the most of their limited space and elevate their daily bath experience.

FEATURES:

-  No water stains (if installed with nano-coated glass)
-  Resistant to corrosion
-  Aesthetic looks
-  Easy to clean
-  Stops the spread of water
-  Sturdy and durable
-  Accessories tested to European standard EN14428z

LATO

FEATURES:

LATO is an L-shaped Shower Cubicle that is designed to fit into a corner of a bathroom. As the name suggests the cubicle is shaped like the letter L, with one side running along the wall and the other side extending out at a right angle to form the corner. LATO can be a popular choice because it can maximize the use of space in a bathroom while also providing a comfortable showering area.

No water stains (if installed with nano-coated glass)

Stops the spread of water

Sturdy and durable

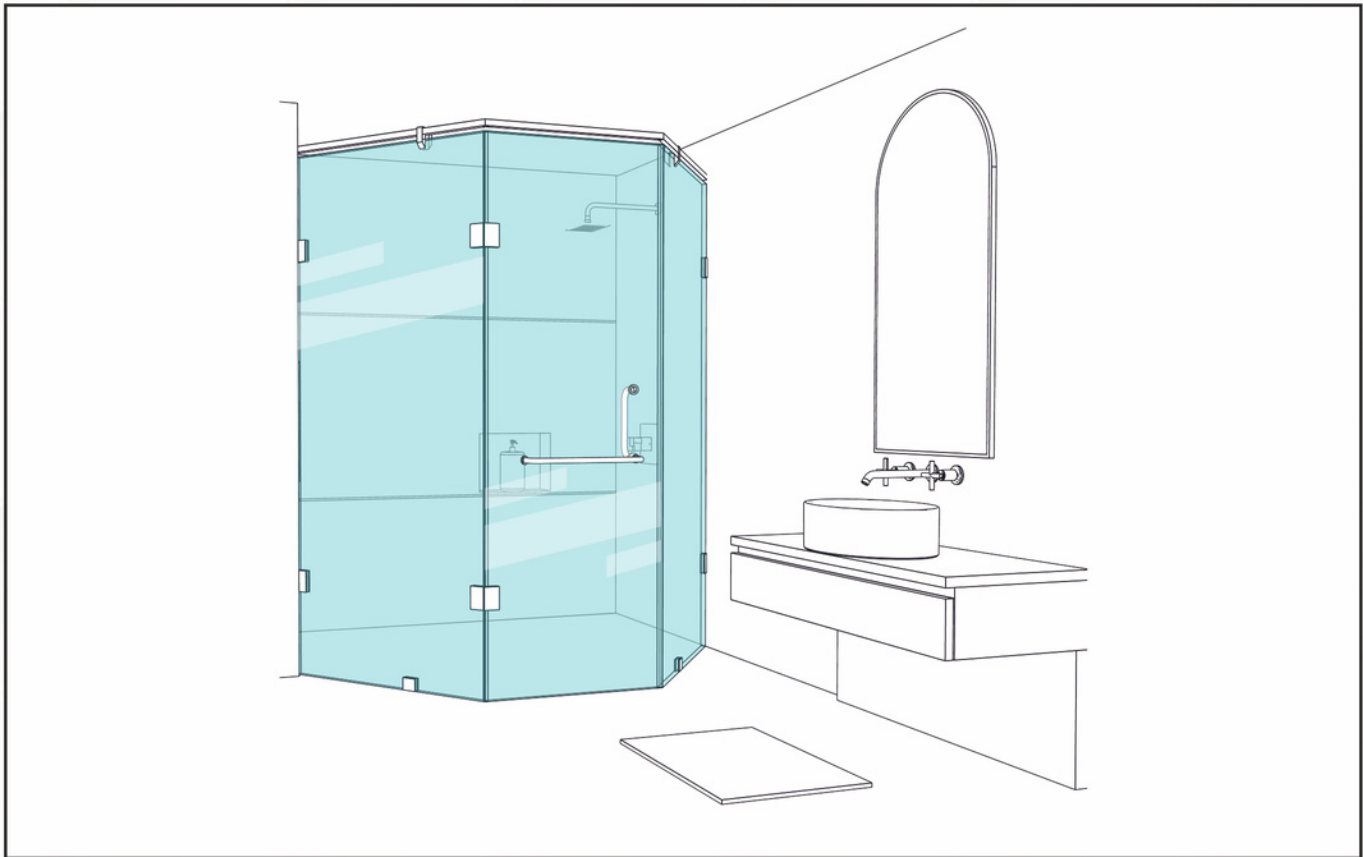

Extra space

Accessories tested to European standard EN14428

HEXA

HEXA Shower Cubicles are designed to fit into a corner of a bathroom. It is also called a 135-degree cubicle because the two sides of the cubicle meet at an angle of 135 degrees. This creates a more spacious showering space than a traditional 90-degree corner shower cubicle. HEXA Shower Cubicles are usually ideal for bathrooms with more space and can provide a stylish, asymmetrical, and modern look to the bathroom.

FEATURES:

No water stains (if installed with nano-coated glass)

Resistant to corrosion

Aesthetic looks

Easy to clean

Stops the spread of water

Sturdy and durable

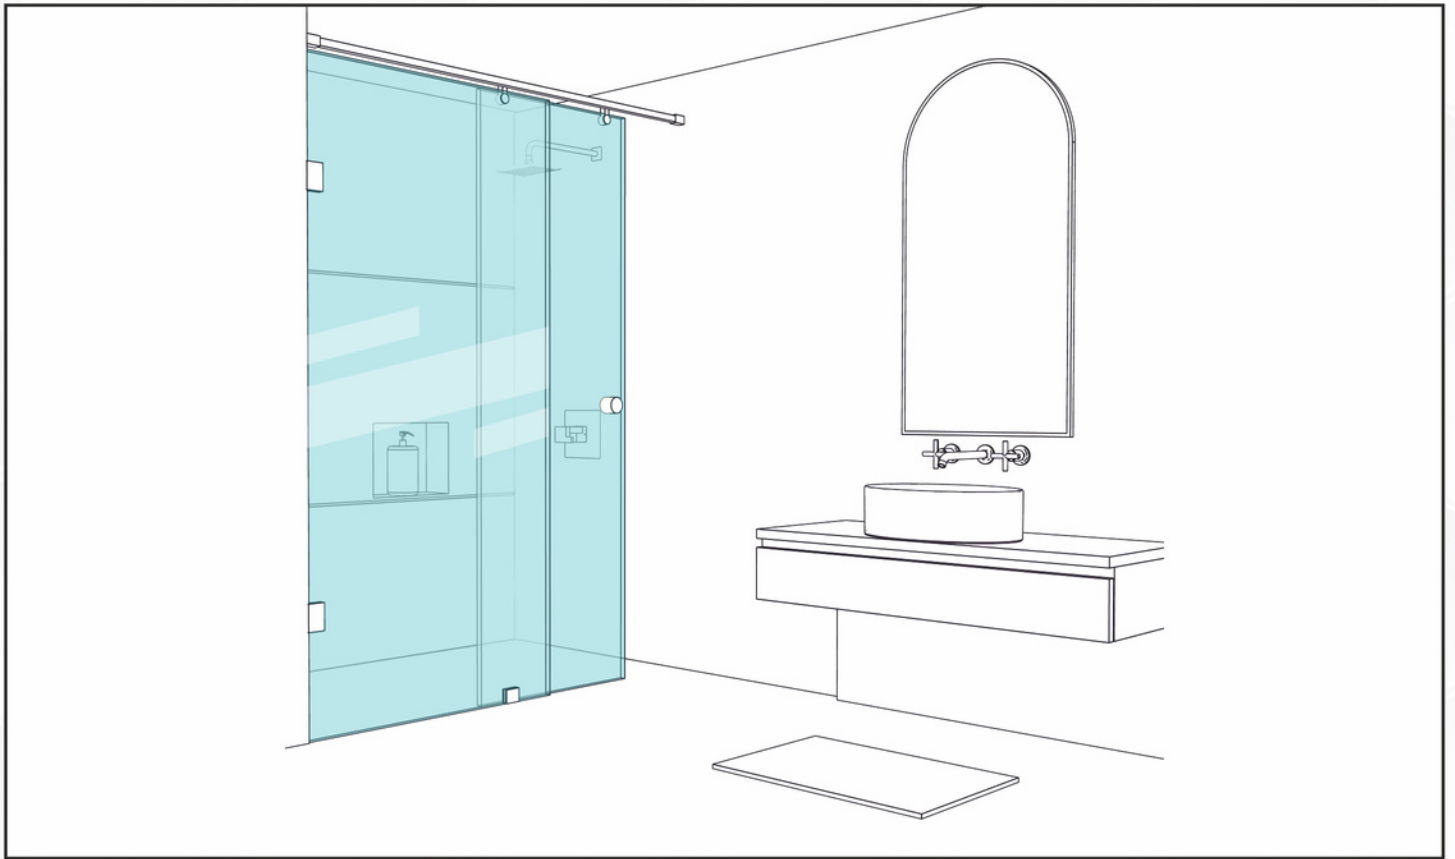

More elbow room

Accessories tested to European standard EN14428

FLOTER

FLOTER Shower Cubicles have sliding doors instead of hinged doors. These doors seamlessly slide along the tracks giving a smooth transition into the sacred bathing space. FLOTER can be a popular choice because they are specifically designed to save ample space in the bathrooms. FLOTER Shower Cubicles can transform a simple bathroom into a luxurious bathing experience, making them a versatile choice for many bathrooms.

FEATURES:

No water stains (if installed with nano-coated glass)

Resistant to corrosion

Aesthetic looks

Easy to clean

Stops the spread of water

Sturdy and durable

Can be installed in compact spaces

Easy to operate

MONO

MONO Shower Cubicles have a fixed panel or fixed glass without a door. They are also known as walk-in showers or open showers. They are an excellent choice for those who want a minimalist and modern look in their bathroom, as it creates a sleek and open feel. It is also a practical choice for those who have mobility issues.

FEATURES:

No water stains (if installed with nano-coated glass)

Resistant to corrosion

Aesthetic looks

Easy to clean

Limits the spread of water

Sturdy and durable

Can be installed in compact spaces

Easy to maneuver around

Accessories tested to European standard EN14428

SPIDER GLAZING

SPIDER GLAZING

Spider Glazing is a modern and aesthetic method of installing glass panels in architectural structures, commonly used in building facades, canopies, and skylights. It involves the use of structural silicone sealants and stainless steel point-fixing hardware, resembling spider legs, to secure the glass panels to the structure without the need for traditional framing.

ADVANTAGES

-  Enhanced Aesthetics
-  Structural Flexibility
-  Weather Resistance
-  Ease of Maintenance
-  Quick Installation

DESIGN & BUILD:

Our approach to Spider Glazing design and build revolves around collaboration, creativity, and meticulous attention to detail. We work closely with architects, designers, and clients to understand their vision, functional requirements, and aesthetic preferences. This collaborative process allows us to develop customized spider glazing designs that seamlessly integrate with the overall architectural concept.

KEY ASPECTS

-  Design Consultation
-  Material Selection
-  Engineering and Structural Analysis
-  Customization and Innovation
-  Seamless Integration
-  Professional Installation

AUTOMATIC ENTRANCES

Automatic Entrances, such as sliding doors or revolving doors, provide enhanced accessibility, efficient traffic flow, and improved energy efficiency in buildings. When integrated with Spider Glazing, they offer a seamless transition between indoor and outdoor spaces, complementing the sleek and modern design of the Spider Glazing System.

By integrating automatic entrances with spider glazing, AVNI provides a comprehensive architectural solution that combines aesthetics, functionality, and security.

GLASS PARTITION SYSTEMS

PARTITION SYSTEMS

AVNI uses innovative partition systems that redefine the way spaces are divided and organized. These partition systems are designed to create functional, aesthetically pleasing, and adaptable environments, enabling you to optimize the use of your space while maintaining a seamless flow throughout.

FEATURES:

-  Versatile Design Options
-  Flexible Space Division
-  Acoustic Performance
-  Natural Light Integration
-  Easy Installation and Adaptability
-  Durability and Quality
-  Environmental Product Declaration (EPD) Certified (ISO 14025 & EN 15804)

TOUCH FREE ACCESS:

At AVNI, we understand the evolving needs for hygienic and secure access control solutions in today's world. That's why we offer seamless integration of touch-free access technology with our partition systems, providing a safe and convenient way to manage entry and exit points within your spaces. This technology includes systems like automatic sliding doors & automatic swing doors.

FEATURES:

-  Contactless Entry
-  Enhanced Security
-  User-friendly Experience
-  Flexibility and Scalability
